

Spotlight on key products and services to be showcased at SATEXPO Middle East (colocated with CABSAT) Dubai, UAE, May 13-15, 2025 and Satellite Asia, Singapore, May 27-29, 2025

AvL Technologies

visit AvL at Satellite Asia booth # 4J2-1

AvL Technologies, Inc. excels in multi-band and multi-orbit mobile and flyaway terminals. Delivering innovative, rugged solutions for both the commercial and defense sectors; providing superior performance and reliability backed by outstanding customer support. An industry leader in next generation satellite technology.

For more information go to: www.avltech.com

Es'hailSat Qatar Satellite Company

visit Es'hailSat at SATEXPO ME booth #S3-B10, Sheikh Saeed Hall 3

Es'hailSat, the Qatar Satellite Company, is a communications satellite operator headquartered in Doha, Qatar. Established in 2010, Es'hailSat delivers services to broadcasters, enterprises and governments in the MENA (Middle East and North Africa) region and beyond. With the goal to become a world class satellite operator and the foremost satellite services provider in the MENA region, Having both Ku-band and Ka-band payload on satellites co-located at 25.5°E / 26°E broadcast hotspot enables Es'hailSat to provide the region with the most advanced and sophisticated services including broadcast, telecommunications and broadband.

JONSA Technologies

visit Jonsa at Satellite Asia booth # 4K1-12

Jonsa Technologies specializes in cutting-edge satellite communication solutions in making high-quality parabolic dish with VSAT, Flyaway and Maritime antenna for over three decades with capability a in designing, inventing and producing with services of OEM and ODM. JONSA VSAT solutions offer high-speed internet access, secure data transmission, and seamless connectivity, regardless of geographic challenges. Key Benefits of Our VSAT Solutions include: **Reliable Connectivity:** Our technology ensures continuous connectivity, even in the most remote areas, minimizing downtime and maximizing productivity. **Scalability:** Whether you're a small enterprise or a large corporation, our VSAT solutions can be tailored to fit your specific needs and scale with your business growth. **Cost-Effective:** We provide competitive pricing models that help you optimize your operational costs while delivering top-tier service. **Expert Support:** Our dedicated support team is available around the clock to assist you with any technical issues or inquiries.

For more information, please visit www.jonsa.com.tw or email saccount@jonsa.com.tw

Integrasys

visit **Integrasys at SATEXPO ME booth # 202, Sheikh Saeed Hall 2 and Satellite Asia booth # 4G2-1**

Integrasys, founded in 1990 by former Hewlett Packard engineers, specializes in software solutions and manufacturing of Satellite Spectrum Monitoring Systems, VSAT Installation & Maintenance, and Link Budgets in the SAT-COM and broadcasting markets. With over 20 products, including Beam Budget, FlexCap, Controlsat, and Vectorsat, the company has been leading

the innovation in the satellite industry for over 30 years. At INTEGRASYS, our mission is to provide the industry with the best quality and fastest technology available to save time, effort, and OPEX, with the service and care that our customers deserve.

For more information on Integrasys' products go to: <https://www.integrasys-space.com/products>

Intersputnik

visit **Intersputnik at SATEXPO ME booth # S3-C40, Sheikh Saeed Hall 3**

Founded in 1971, **Intersputnik** is an international intergovernmental organization, which today unites 25 countries. The organization's mission is to contribute to the strengthening and development of economic, scientific, technical, cultural and other relations by communications, radio and television broadcasting via satellites and to ensure cooperation and coordination of the efforts of the members of the organization in the design, establishment, operation and development of the Intersputnik international satellite telecommunications system. Intersputnik's unique status allows the organization doing business based on international cooperation. The organization has access to the bandwidth of most commercial satellite operators across the world and major satellite communications systems, including ABS, Azerspace, Belintersat, Eutelsat, Intelsat, SES, Turkmen Hemrasy, Express, and Yamal. Intersputnik provides the users located on all continents with the capacity of geostationary and non-geostationary satellites and the whole range of up-to-date satellite telecommunications and broadcasting services including the deployment of corporate and civil government satellite networks, cellular backhaul via satellite, broadband Internet access, communications on the move, as well as TV distribution networks in any geographic location.

Mission Microwave

visit **Mission Microwave at SATEXPO ME at the Decibel Systems booth #S2-C20, Sheikh Saeed Hall 2 and at Satellite Asia at Booth #4J2-7**

Mission Microwave

Technologies is at the forefront of the satellite communications industry

in shipping high power X-, Ku-, and Ka-Band BUCs for critical applications in ground, maritime, aviation and aerospace applications for government and commercial industry sectors that require high efficiency, reliability and performance. Mission Microwave brings revolutionary design for RF (Radio Frequency) and microwave electronics, using the latest in GaN semiconductor technology. Mission Microwave's focus is to minimize the size, weight, and power (SWaP) for these critical applications while providing its customers with the best possible reliability.

Mission Microwave X-, Ku-, and Ka-band GaN BUCs

ND SATCOM: The future is Now. The Future is SKYWAN 5G

visit ND Satcom at SATEXPO ME booth # S2-G25, Sheikh Saeed Hall 2 and at Satellite Asia booth # 3K3-7

INSTALLING
RELIABILITY

With over three decades of experience, ND SATCOM, headquartered in Germany, is the premier supplier and integrator of innovative satellite communication systems and solutions to support customers with critical operations around the world. Customers in more than 130 countries have chosen ND SATCOM as a trusted and reliable source of high-quality, secure turnkey and custom system-engineered communication solutions. The company's products and solutions are used in more than 200 transnational net-

works in government, military, telecommunications and broadcasting sectors. The flagship of ND SATCOM, the SKYWAN platform, enables international users to communicate securely, effectively and quickly over satellite.

RF-Design

visit RF Design at SATEXPO ME booth # PD34, Sheikh Saeed Hall 2 and at Satellite Asia booth # 3K3-3

For over 25 years, RF-Design has been developing, producing and distributing technologically leading solutions for the ground segment of satellite communication systems. We offer a wide range of high-quality systems for RF distribution, RF-over-fiber transmission, signal amplification and RF monitoring. Many years of experience, technical know-how, a high degree of flexibility and the ability to customize products to meet individual customer requirements make RF-Design a globally valued partner in this demanding industry. A special focus is placed on a customer-oriented service approach that combines technical excellence with personal advice.

Meet us at CABSAT 2025 in Dubai or at Satellite Asia in Singapore and get to know our latest products such as the highly flexible and secure "Fiberlinkplus CompactLine" system, our innovative space-saving handheld Extended L-Band and Broadband "Ecoline Fiberlink", the modular QLink Quad RF-over-Fiber system, the switch matrix system "FlexLink S9E", and the dual RF power meter "PwrM70G". We look forward to talking to you personally and discussing your individual requirements.

Spacebridge

visit Spacebridge at SATEXPO ME booth # S2-E20, Sheikh Saeed Hall 2 and at Satellite Asia booth # 4C2-1

Unleash reliable power with **Spacebridge's** SBB0200K – 200W Outdoor BUC/SSPA. Engineered for mission-critical performance, the SBB0200K is a compact yet powerful 200W GaN-based outdoor BUC/SSPA designed for App30B-15 Ku-band (12.75 - 13.25 GHz) or KX-band (13.75 - 14.5 GHz) bands. Built to thrive in extreme environments, its rugged IP67 housing eliminates waveguide losses by mounting directly on the antenna—no shelter or air conditioning required.

Perfect for multicarrier, multi-transponder applications such as DTH distribution, HTS VSAT hubs, and cellular backhaul, it delivers outstanding linearity and supports high-efficiency 256 APSK modulation even on 1.8m antennas. Packed with smart features like built-in redundancy (no controller needed), precision RMS power monitoring, overdrive/VSWR protection, REST API, and remote control via SNMP or web interface—this next-gen BUC/SSPA is engineered for uptime, scalability, and peace of mind. From disaster-resilient networks to high-throughput deployments, the SBB0200K delivers power, performance, and reliability—wherever you need it most.

For more information, go to: www.spacebridge.com

SatService GmbH

visit SateService at SATEXPO ME booth # 304, Sheikh Saeed Hall 3 and at Satellite Asia at the

Calian booth #4G2-8

For over 25 years, **SatService GmbH** from Steisslingen/Germany has been operating as a system integrator, manufacturer and provider of hardware and software for satellite ground segment applications. We provide competitive and customer dedicated products as well as system solutions with high quality and quick reaction time. Our strength is the combination of system engineering and integration know-how merging with highly sophisticated products. Our sat-nms product line includes Monitoring & Control NMS/M&C systems, Antenna

Control Units, Beacon Receivers, RF-over-Fiber solutions and various other equipment. We are proud to say that our products and systems are running at major satellite operators, teleports, broadcasters and other communication providers around the globe.

For more information, go to: www.satservice.gmbh.de

Terrasat Communications

visit Terrasat at Satellite Asia booth # 4J2-1

Performance. Protection. Innovation. For Networks That Can't Afford Downtime.

Terrasat's Tx 1:2 Redundant Systems are built for the moments that matter—when uptime is mission-critical. With intelligent fault detection, rapid failover switching, and a robust design proven in the field, our system keeps uplinks stable and operational in even the

harshest environments.

Engineered for high-power C-, X-, Ku-, and Ka-band applications, the Tx1:2 is ideal for gateways, teleports, and high-availability terminals. Features include hot standby redundancy, and a web-based interface for full remote monitoring and control. The 1:2 configuration—two active IBUCs and one spare—delivers the same protection as two Tx 1:1 systems, with reduced hardware requirements and streamlined operation.

Terrasat's IBUCs are trusted for their long-term durability, transparent performance specs, and advanced monitoring features, helping you meet SLAs while minimizing on-site maintenance.

Explore the full system at: www.terrasatinc.com

WORK Microwave

visit WORK Microwave at SATEXpo (CABSAT) booth #S1-M30c, Sheik Saeed Hall 1 and at Satellite Asia booth # 3K3-1

Headquartered in Holzkirchen, Germany (near Munich), and comprised of four operating product lines —Satellite Communication, Navigation Simulators, Defence Electronics, and Sensors and Measurement — **WORK Microwave** leverages over 35 years of experience to anticipate market needs and apply an innovative and creative approach to the development of its technologies while maintaining the highest standards for quality, reliability, and performance. WORK Microwave's Sat-

ellite Communication product line develops and manufactures high-performance, advanced satellite communications RF- and optical ground segment hardware and software for earth observation, NGE0 constellations, direct-to-home broadcast, IP networks, teleport management, government communications, and many more applications.

For more information, go to: www.work-microwave.com

Jonsa Technologies

Jonsa Technologies from Taiwan is a trustworthy manufacturer of communication antennas, and our monthly production capacity has been over one million in a variety of antenna products. We are waiting for the new partner who cooperates with us and creates the win-win situation together.

The best-selling product of Jonsa includes:

0.6M/0.9M Auto and Manual Flyaway

- Ring focus antenna with segments reflector
- Support Ku and Ka band as an option
- Carbon fiber reflector with light weight, high strength and one person can finish the installation within 3 minutes.
- Easy operation with one button.

VSAT (E74/97/120) antenna

- Customized VSAT antenna products
- Correspond with electronic devices, such as integrated LNB and Feedhorn
- Support Ku and Ka band as an option

0.6M/0.9M Ka and Ku band Maritime with Radome

- One-touch commissioning
- High gain and carbon fiber antenna
- Support beacon receiver, DVB-S, DVB-S2, and digital tracking system

For more information, please visit:

www.jonsa.com.tw

or email: saccount@jonsa.com.tw

**At Satellite Asia in Singapore
visit Jonsa at booth # 4K1-12**

JONSA®

- Support Ku and Ka band as an option.
- Carbon-fiber reflector with fast and high-quality transmission.
- The Ku/Ka band antenna can correspond with branded electronic devices, such as Feedhorn and integrated LNB.
